

CHARGE INTO FIRE SAFETY™

Fire Prevention Week | October 5 - 11, 2025

From Smartphones to Power Tools — Lithium-Ion Batteries Are Everywhere. But when misused or damaged, they can spark serious fires. This Fire Prevention Week, the National Fire Protection Association® and Convergentz Fire & Life Safety are teaming up to raise awareness about lithium-ion battery safety in commercial environments. Whether you're running HVAC systems, using diagnostic tools, or managing office tech — battery safety matters.

Whether you're running HVAC systems, using diagnostic tools, or managing office tech — battery safety matters.

⚠️ TOP 3 SAFETY TIPS FOR BUSINESSES

1. Buy Smart

- Choose products tested by nationally recognized labs
- Avoid off-brand or uncertified devices

2. Charge Safely

- Use manufacturer-approved chargers
- Charge on hard, flat surfaces
- Never charge on soft furniture or under pillows
- Unplug once fully charged

3. Recycle Right

- Never toss batteries in the trash
- Visit call2recycle.org to find safe drop-off locations

"Lithium-ion batteries are powerful tools in our industry — but they must be handled with care,"

— Kyle Jarnagin, GM, Convergentz FLS
